

A Closer Look on IBS Science Day 2011 19 August 2011

Science day was observed by the IBS 2 students on 19 August 2011. A 2 hour activity was held at the assembly area. The activity was divided into two parts; the first part was a short program which involved a variety of performances such as dance presentation, group presentation about 'Mother Earth', IBS Young Inventors and Fashion show.

Nine of SIP Grade 2A shows off his enormous talent in dancing, and the audience went wild when they saw his great moves while dancing. Meanwhile, the selected students from level 1 have presented a Science awareness activity wherein they have shown the beauty of the Earth. Some students were wearing different costumes during their presentation. They portrayed plants, trees and animals. They have sent message thru their performance that people should take care of the 'Mother Earth'. After the level 1 presentation, the IBS Young Inventors have presented their invention to the audience which was already pre-judged prior to this activity. The winners were also revealed and awarded on their invention made.

A fashion show followed after the awarding of the winners for the Young Inventors. The theme of the fashion show was 'Use, re-use and recycle. There were three groups from different levels participated on this fashion show. Their costumes were made from used materials such as plastic, papers, straws, sacks and many more. There were two parents who joined the panel of judges to judge the contestants. The awarding for the winners followed right after.

The part 2 of the Science Day was the booth activity. The English and Foreign Departments had prepared booths for the students to continue exploring their knowledge in Science by doing practical activities when visiting the booths. Everyone was excited and had fun at the end of the activity.

We believed that the objective of the activity was attained that was to spread the message of importance of science and its application among people.
